

## Technical Visit Course #1

- Toward future railway service

# Tokyo Freight Terminal Station (JR FREIGHT)

---

## One-Day Visit (Friday, November 1, 2019)

### Course Outline:

Tokyo Freight Terminal Station is a station of Japan Freight Railway Company (JR Freight). It is near Tokyo Port and Haneda Airport, and is one of the largest freight terminal stations in Japan, serving as the center of logistics in the Tokyo metropolitan area and a hub station for container transportation connecting the entire country. In this Technical Visit, we will visit Tokyo Freight Terminal Station, Oi Engine Depot and the Central Training Center. You will have a chance to see the container platforms and cargo handling works in Tokyo Freight Terminal Station. And also you will see active models of locomotives and M250 series of cargo trains at Oi Engine Depot and a driving simulator for training drivers at the Central Training Center. This Visit will enable you to understand the efficiency of Japanese railway freight transportation, which is a vital part of the lifeline of Japan.
